Your Unique Experience

In our consultation we go over what to expect before, during and after your session(s) including your session selections, preferences, style guide, products available, packages, proofing and more including what current offers we have to maximize your investment.

The experience is made up of three visits:

- 1). The consultation when we get to know each other and cover all your options to make a unique experience with our detailed questionnaire. This includes the session experiences you want, guidance on how to dress and what accessories to bring. Hair, makeup, shoes and clothing selection are important along with what you do not want to include. We will cover our style guide at this session as well.
- 2). The day of pictures where we have fun and capture the essence of you, after all you are 18 years in the making, we want to show the results! We will visit multiple locations and utilize many clothing changes to ensure you have plenty of styles, color and locations to choose from with your prints.
- 3). After the session we will schedule time for your reveal and look at framing, canvas, prints, album samples & more while you see your images set to a custom slideshow with music. This proofing session will be electronic so you can see the untouched pictures; we professionally refinish all selected poses for a true portrait experience to last a lifetime. After the collections are purchased we start our refinishing.

TWELFTH YEAR

So, be who you are! Do that, and you'll cherish your photos for a lifetime.

Location plays an important role in every session. After all, a location will compliment your personality. Part of our questionnaire will determine where we conduct your sessions. Input is necessary!

We love working with Seniors. We started photographing youth sports almost ten years ago and those athletes are now seniors! Our passion lies in capturing each person's individuality while having fun which makes our sessions so enjoyable.
